One touch postage and sort
Streamline mailroom workflow
Eliminate manual metering

EZ-Letters System
Discover the Smallest Footprint Letters System

EZ-Letters Mail Path

The EZ-Letters Difference

- Smallest letter sorter footprint on the market.
- Fits through any standard door.
- Lowest entry cost and quickest ROI
- First time operators are up to speed in 30 minutes.

Discover the **EZ-Letters System**

Streamline operations and optimize postage savings.

Engineering Innovation designs postage savings solutions for mailers of all sizes. EZ-Letters allows you to directly access automation discounts while eliminating the meter by applying permit postage.

How we made it happen!

We Listened!

After receiving feedback from the mailing industry about the high costs and space requirements of current letter processing equipment, we developed a sorter that sorts letters with the lowest cost of entry available today. With a throughput of up to 18,000 letters per hour, EZ-Letters is designed to deliver immediate efficiencies to small and large mailrooms alike.

Versatile

Able to handle metered mail, permit mail, and manifest mail, this versatile solution features an OCR that can read letters for Automation discounts, while providing mailers the option to go for MADC through 5-Digit discounts selectively.

Key EZ-Letters features include the optional Weigh on the Fly Scale and HP cartridge-based high speed printer for printing postal barcodes, indicia, addresses, and sorting codes. Coupled with its manifesting capability, mailers can dramatically lower labor, equipment, and ink costs while combining posting/processing into a single-step routine.

The EZ-Letters processing platform is highly scalable. The “out-of-the-box” unit, at a mere 3x5 feet, can fit through most doors and into any room. Single-sided stackers allow the machine to be set up against a wall to fit into the tightest mail room. Double sided sections are now available with the U-Turn and allow for higher volumes and more complex sorting requirements.

Components

- Automatic feeder
- Optional weigh-on-the-fly scale
- Best-in-class OCR
 - High resolution
 - Reads machine print
 - Reads handwritten mail
- High speed printer
- Touch screen monitor
- Expandable stacker sections
- Tray tag printer

Key EZ-Letters Features

- Intake feeder singulates the mail
- Multiple stacker configurations
 - Single-sided
 - Double-sided
 - Multi-tier
- 18,000 letters per hour throughput for same-weight mail
- 10,000 letters per hour with optional inline scale for mixed-weight mail
- Utilizes Parascript and/or RAF Platinum software for address recognition
- Wide Area Bar Code Reader (WABCR) reads up to 3 barcodes for tracking, proof of processing, and populating IMB
- UMove for Move Update compliance (optional)
- Handles mail sizes up to 10" x 13" x 1/4" and weight up to 16 ounces
- Server based configuration
- Fits the Eii One Mailroom™ Solution
- Prints IMB postal barcode, indicia, unique piece ID, endorsement, and (optionally) addresses
- Prepares the USPS Manifest
- Highly flexible billing options
- Cost center bill-back by mail class

The Results are In!

The multi-functional EZ-Letters System has the capabilities you expect in a larger machine at a fraction of the cost.

- OCR reads and barcodes letters for a minimum 5.5 cent discount, optionally sort for higher discounts
- Obtain postage discounts of up to 30 cents on two-ounce letters
- Handles Meter mail and Permit mail
- Processes First Class, Standard, Incoming, International, and Vote By Mail
- Automate office, production, and promotional mail
- Equipment enables commingling of mailstreams
- Incoming mail feature with customizable sort profiles automates a cumbersome daily function
- Processes reject mail from other sorting equipment

EZ-Letters delivers efficiencies to both small and large mailrooms!
