the parcel industry.

LightSortTM
Parcel Sorter

Discover Eii's all new *LightSort*[™] Parcel Sorter

Looking for an innovative parcel system? Eii's LightSort[™] features a flexible design and accurate light system which increases productivity.

Hands-Free Scanning

Mobile

Pre-Loaded Bags

Multiple-Sort Destinations

Easily integrated into existing processes, the *LightSort*[™] Parcel Sorter uses light technology that allows operators to do their job with less stress. This sort-to-light or pick-to-light design is a low-cost way to quickly improve accuracy, productivity, and data tracking. This system is low maintenance, durable, and easy to move for reconfiguration and storage.

Don't spend time manually looking for "hard-to-see" sort destinations or pick locations anymore! Simply scan the barcode and the location will light up. Minimal training means operators are up to speed in no time and can quickly sort or fill orders and track data using our hands-free ring scanner.

Advantages

The advantages of the *LightSort*[™] are too good to pass up! Check out just a few of the features below:

- Sort-to-Light or Pick-To-Light Configuration
- Increased Accuracy of Sort/Pick
- Flexible Number of Sort Destinations
- Wireless Ring Scanner
- Data Collection
- Battery Powered Option
- Easy Shipping and Assembly
- Mobility
- Durability
- Low Cost & Low Maintenance
- Increased Accuracy of Bag Tags
- Generation of Productivity Data
- Drop-out-the-back and Preloaded Bags
- Easy Creation & Selection of Sort Profiles
- Optional bagazine to speed loading of bags

Increase Productivity

- Minimal training means a new operator can begin sorting right away
- Ring scanner allows freedom of movement and operator to pick up a stack of packages
- Increased accuracy translates to increased productivity
- Dropping full bags out of the back is fast and easy
- Preloaded bags means quickly getting back to sorting
- Collection of data on USB allows analysis of productivity
- Barcodes can be scanned from any angle
- Lights flash to gain attention and speed sortation

Additional Capabilities

- Set sort profiles from a central location
- Collect data near real time in central location
- Generate reports and display dashboard information
- Allow remote access and diagnostics
- IMpb tracking
- Print-on-demand bag tags

Accurate

Our light technology makes it easy for operators to get the right location every time.

Scanning the bag tag will light the bin to verify the correct bag before application.

Flexible

Racks can be configured in groups to allow various number of sort locations.

Create and select sort profile options with ease.

Racks are easy to move for reconfiguration and storage.

Racks are easy to disassemble, ship and reassemble.
