**Parcel-Processing
Automation That Adapts
to Your Environment**

 **Chameleon™**

Adapt to your environment with the

Chameleon™

Parcel-Processing Solution

The Chameleon™ Parcel-Processing Solution is the only modular, tracking savvy equipment solution that makes parcel automation cost effective for rapidly growing operations.

Only with the Chameleon™ Parcel-Processing Solution can a growing parcel operation affordably initiate an automation solution that's capable of swiftly processing parcels - and scale that line up or down with changes in volume, or market requirements.

Unlike fixed systems, the Chameleon™ Parcel-Processing Solution is fully adaptable. It provides customizable options including sorting, dimensioning, labeling, barcode reading, OCR reading, and RFID capabilities.

End the frustration of being told to change your environment to accommodate other parcel options. Engineering Innovation's Chameleon™ Parcel-Processing Solution can be configured to seamlessly blend into your existing operation. Proposed configuration changes are best left to situations where they create efficiencies driven by your needs!

Engineering Innovation's team of specialists are well acquainted with optimizing the value of our solutions around the client configuration, even in cases that don't lend themselves to a traditional operational layout.

Key Chameleon™ Features

- Ideal for Outbound Processing, Data Capture, Parcel Inbound and Logistics companies
- Simultaneous weighing, dimensioning, and OCR reading
- Multi-purpose OCR reads the address for manifesting, barcoding, tracking, and proof of processing
- Flexibility to capture address block, barcodes, and weights
- Scale detects parcel weights from one oz to 100 lbs
- Sort packages with weights between 5 to 75 lbs
- Handles packages as large as 25" x 25" x 36"
- Process boxes, envelopes, or poly bags
- Speed ranges from 1,000 to 20,000 parcels an hour.
- Interfaces with OMS, WMS and other business systems
- Outputs a unique shipping label featuring barcode, unique piece ID, proprietary sorting/routing codes, and other business information
- Apply labels automatically, or manually in exception process
- Works in parallel with other Eii machines
