

PrismTM Dimensioning System

Measure Once. Measure Right.

The Prism dimensioning solution automates dimensional data collection for mail operations, helping organizations capture accurate measurements, reduce manual effort, and simplify compliance with evolving shipping requirements. Designed as an easy-to-deploy upgrade for The Champ, Prism captures dimensional data during processing, eliminating the need for manual measurement and improving confidence in reported data.

With its plug-and-play design and customer-friendly installation, Prism provides a straightforward path from manual processes to automated dimensioning. Organizations can quickly add accurate dimensional data collection without replacing existing equipment or disrupting established workflows.

Whether you're preparing for new dimensional reporting requirements or looking to improve operational accuracy, Prism helps ensure every piece is measured consistently and reliably.

Key Benefits

- **Automated Data Collection**
Apian Sort keeps your equipment running smoothly, safeguarding your investment and your future.
- **Simple Integration**
Prioritizes data protection by leveraging the inherent security of cloud-based technology.
- **Built for Evolving Requirements**
Effortlessly integrates with your existing hardware infrastructure, minimizing disruption and maximizing ROI.
